EDUCATION

Northeastern University (Boston, MA)	Expected May 2027
Master of Science in Data Analytics Engineering	
Relevant Coursework: Machine Learning, Computation and Visualization, Data Management	
National Changhua University of Education (Changhua City, Taiwan)	January 2025
Bachelor of Business Administration	

SKILLS

Programming: Python, SQL, R

Databases: MySQL, MongoDB, Relational Database Design

Visualization & BI: Power BI, Tableau, Plotly, Matplotlib

Analytics: Data Cleaning, Statistical Analysis, Feature Engineering, Dashboard Development

WORK EXPERIENCE

Chunghwa Telecom (Taipei, Taiwan)	Jan 2024 – Jun 2024
Cloud Team Intern (Business Analyst)	
- Analyzed 3,000+ AWS customer accounts using Excel, Power BI, and AI-assisted analytics workflows to evaluate usage trends, traffic patterns, and cloud service performance. - Conducted ROI and campaign performance analysis to support marketing strategy, budget allocation, and data-driven business decision-making. - Collaborated with AWS, Azure, and GCP teams to support cloud business reporting, analytical insights, and operational reporting automation.	

PROJECTS

City Score Analytics (Python, pandas, NumPy, Plotly, GeoPandas)	2025
- Built a livability scoring framework across 17 ZIP codes using 16,000+ data points from socioeconomic, housing, education, and public safety datasets. - Performed data cleaning, feature engineering, and geospatial visualization to generate ZIP-level rankings and regional insight dashboards.	
Aerospace Patent Analytics (Python, pandas, Plotly, GeoPandas)	2025
- Analyzed 2,000+ aerospace patents across 380+ U.S. metropolitan areas to identify regional innovation clusters and industry concentration trends. - Built interactive geospatial visualizations using Plotly and GeoPandas to highlight metro-level rankings and spatial distribution patterns.	
AWS Customer Management System (MySQL, MongoDB, Python)	2026
- Designed a relational database with 12 normalized tables, 100+ records, and 10+ SQL queries to analyze AWS customer purchases, billing records, and service usage patterns. - Built a Python analytics application using mysql.connector and pandas to generate customer spending and service demand visualizations.
