

CHE-WEI LEE

617-286-9011 | lee.chew@northeastern.edu | <https://www.linkedin.com/in/che-wei-lee-6b377a276/> | Boston, Ma

EDUCATION

Northeastern University (Boston, MA)	Expected May 2027
Master of Science in Data Analytics Engineering	
Relevant Coursework: Machine Learning and Data Analytics, Computation and Visualization, Data Management for Analytics, Neural Networks and Deep Learning	
National Changhua University of Education (Changhua City, Taiwan)	January 2025
Bachelor of Business Administration	
Relevant Coursework: Big Data Analytics, Statistics, R Programming, Information Management System, Operation Research	

SKILLS

Programming & Analytics: Python, R, SQL
Visualization & BI: Tableau, Power BI, Matplotlib, Plotly, GeoPandas
Machine Learning & Data: Statistical Analysis, Feature Engineering, Data Modeling, DBMS

WORK EXPERIENCE

Chunghwa Telecom (Taipei, Taiwan)	Jan 2024 – Jun 2024
Cloud Team Intern (Business Analyst)	
- Analyzed 3,000+ AWS customer accounts using Excel and Power BI to evaluate usage trends, traffic patterns, and cost structures for monthly performance reporting - Conducted campaign performance analysis using ROI and traffic metrics to optimize budget allocation and improve marketing decision-making - Collaborated with senior managers and cloud providers (AWS, Azure, GCP) to support data-driven business initiatives and strategic reporting	

PROJECTS

City Score Analytics	Fall 2025
- Built a livability scoring framework across 17 ZIP codes using Python, pandas, and 6 public datasets with 16,000+ data points from socioeconomic, housing, and public safety sources - Performed data cleaning, feature engineering, and weighted normalization in pandas and NumPy to standardize variables and generate ZIP-level comparative rankings - Developed interactive geospatial dashboards using Plotly and GeoPandas to visualize spatial patterns, regional rankings, and location-based insights	
Aerospace Patent Analytics	Fall 2025
- Analyzed 2,000+ aerospace patents across 380+ U.S. metropolitan areas using Python, pandas, and public innovation datasets - Performed data aggregation, CBSA-level geographic mapping, and feature transformation to identify regional innovation clusters and industry concentration trends - Developed interactive geospatial visualizations using Plotly and GeoPandas to highlight metro-level rankings and top innovation hubs
